

COMPAREX Short Reference

Project Data

Customer:	Deutsche BKK (Stuttgart)
Industry:	Public Service
Project / Solution:	COMPAREX SAM2GO
Project Time Period:	2012 / 2013

Initial Situation / Challenge

To gain software license compliance in accordance with the requirements of Microsoft, Adobe and Citrix, the customer's licensing situation needed to be updated. Thus, the above-mentioned vendors were observed closely in a first step followed by an examination of further vendors.

Project Summary

Having successfully created a license compliance balance, the customer BKK decided for a quarterly Software Asset Management review with COMPAREX SAM2GO to find out about over- and under-licensing and corresponding measures. Therefore, the compliance balance is quarterly updated and a respective strategy to avoid over- and under-licensing is developed together with the customer.

Customer Benefits / Outcome

- Legal compliance
- Transparency due to updated licensing review
- Cost savings and hedging of future investments (when closing a new contract) due to transparent licensing review
- Encompassing analysis of SAM processes and organization in accordance with ISO standards (ISO/IEC19770-1)
