

## COMPAREX Short Reference

Rödl & Partner

### Project Data

|                              |   |
|------------------------------|---|
| <b>Customer:</b>             | Rödl & Partner GmbH                               |
| <b>Project / Solution:</b>   | Introduction of COMPAREX SAM2GO - Managed Service |
| <b>Project Time Period:</b>  | May 2013  |
| <b>Contract Time Period:</b> | 36 Months   |

### Initial Situation / Challenge

Having an interdisciplinary approach, Rödl & Partner provides audit, accounting, tax and business consulting services for national and international enterprises in all stages of business – from new formations to acquisitions, international expansion and succession planning. Based on a long-time collaboration in the field of licensing, a compliance project (Microsoft license reconciliation) was realized in the scope of an international Enterprise Agreement in order to find a cost-effective solution for relicensing. As a result of international licensing consolidation and optimization and the establishment of a sustainable license management Rödl & Partner went for the COMPAREX SAM2GO solution.

### Project Summary

Rödl & Partner relied on COMPAREX's expertise. Therefore, the solution SAM2GO (Managed Service) was implemented. At first, a license reconciliation based on SAM2GO will be generated to be then further administered within a quarterly cycle (further vendors will be defined in coordination with Rödl & Partner GmbH).

### Customer Benefits / Outcome

- Calculable low costs (no investments in hardware, tools or maintenance)
- Reduced organizational efforts – staffing relief, no training required (MLP etc.)
- Higher safety for audits, knowledgeable at all time
- Investment protection: in case of termination, databases can be converted to every tool with XML interface
