

## Azure Onboarding Service

Rapid and comprehensive support of the cloud experts for free

**How should I use my Azure credits to start enjoying the advantages of the cloud environment as soon as possible? Where do I begin? What do I have to pay particular attention to and how can I ensure that I am aware of the consumption costs at all times? We would be happy to assist you in answering these and many other frequently asked questions.**

The Azure Onboarding Service consists of four parts:

1. An explanation of the Azure portal and report
2. An on-site Azure workshop
3. An explanation of the consumption costs in Power BI (after two months)
4. An Azure Tech Update session (after six months)

### Explanation of the Azure portal and report

In an online session of approximately two hours, we explain how to use the Azure portal and help you to activate your Azure subscription or subscriptions. We also show you how to set up the basics of virtual networks, storage accounts, Azure Active Directory, and virtual machines, after which we take you through the report and configure Power BI.

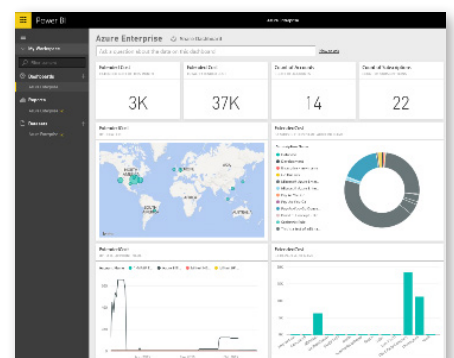

### On-site Azure workshop

We give an Azure Overview Workshop at your business location. In half a day, we show you the possibilities of the platform (from Infrastructure as a Service to Internet of Things) using example scenarios. You are also introduced to COMPAREX's other Azure services.

### Explanation of the consumption costs

After two months, you will receive a personalized Power BI report that makes the costs incurred for the Azure platform clear. You will continue to have access to the Power BI report after the first two months, which means that you will always be aware of the costs of the Azure platform. Based on your consumption, we will also explain how you can achieve further gains and reduce costs.

## Azure Tech Update session

After six months, you will receive a Tech Update (online or on location) in which we inform you about the latest innovations of the Azure platform.

## Target group

This service was developed for IT managers and IT professionals who wish to start using the Azure platform and are wondering about the value that the cloud environment can provide to their organization.

## Conditions

The workshop will take place at your business location. To provide the workshop, we require a room with a beamer/TV, a whiteboard, and an Internet (WiFi) connection.

## Investment

We provide the Azure Onboarding Service for free if you appoint COMPAREX as a Digital Partner of Record (DPOR). Microsoft introduced DPOR to recognize the value of partners that assist organizations in the adoption of cloud solutions. In addition, you would be helping COMPAREX in terms of its Microsoft Partner status as a cloud expert.

## More information

If you would like to receive more information about the Azure Onboarding Service or if you and your colleagues would like to register for participation, please contact Katri Niemi, Manager Cloud Solutions.
