System Center Configuration Manager, Windows Server and System Center Operations Manager

Mikael Nyström
MVP
Senior Executive Consultant
Technology Adoption Program Member
SCCM GEEK WEEK 2018
– live presented by top professionals of Microsoft technology.

COMPAREX Academy and Truesec again offer you the opportunity to attend three new GeekWeeks in Germany.

This is a unique chance to spend 5 full days with two of the foremost experts in the OS deployment sector - Peter Lofgren and Mikael Nyström -, and learn to master and extend the ConfigMgr and MDT platform.

In this training you learn to build and customize rock solid deployment solutions using the new System Center Configuration Manager platform and Microsoft Deployment Toolkit (MDT).

The GEEK WEEK Setup

All of us, participants and instructors, stay at the same “Dorint” hotel, which is located nearby the training facility. This is our fortress where all of us will eat, sleep, laugh, practice, have fun and test new technology. We meet on Sunday evening.

On Monday: We have breakfast at the hotel restaurant and then walk to the class rooms to launch the course. When the first day comes to an end, we head back to the hotel to hang out and discuss specific challenges or solutions.

By the end of the week: We have a joint dinner on Thursday where we summarize the week thus far.
Overview:
This is a unique chance to spend 5 full days with two of the foremost experts in the OS deployment sector - Johan Arwidmark and Mikael Nyström -, and learn to master and extend the ConfigMgr and MDT platform.

In this training you learn to build and customize rock solid deployment solutions using the new System Center Configuration Manager platform and Microsoft Deployment Toolkit (MDT).

Extract Course Content:
- Build Windows 10 reference images, including the fully automated Image Factory process
- Deploy highly secure Windows 10 machines, configured with BitLocker and Credential Guard
- Windows ADK 10 internals, USMT and Provisioning Packages
- Changes to Windows 10 Updates and Offline Servicing
- Updates to Windows 10 PowerShell
- Managing Windows 10 using on-premise using MDM in ConfigMgr
- etc.

Info & Registration:
Course Start: On the evening of February 18.
GS Hotel Geiger Munich

 THE COACHES
- the top professionals on site

**Mikael Nyström** is a Microsoft MVP and Principal Technical Architect at TrueSec, with an extremely broad field of competence. He has worked with all kinds of infrastructure tasks, in all kinds of environments, enterprise to small business. He is currently building Private Cloud solutions based on Hyper-V, System Center and Windows Azure pack as well as building deployment solutions for clients OS as well as Server OS. Mikael is a very popular instructor and is often used by Microsoft for partner trainings as well as to speak at major conferences such as Ignite, TechEd, MMS, etc. Lately Mikael has been deeply engaged in the development of Windows 10, Windows Server 2016 and System Center 2016 as member of the TAP team. Mikael is also a published author with the Deployment Fundamentals book series.

**Peter Lofgren** works as a Senior Executive Consultant at TrueSec. As part of the TrueSec Infrastructure team he helps customers all over Europe and the US to build modern client platforms and datacenters based on Windows 10, System Center and Windows Server. When not working with customer Peter spends his time as instructor in modern client management.
